

DCAA Compliance

For Acumatica Cloud ERP

DCAA Compliance from 3Value built for Acumatica ERP helps government contractors manage cost accounting, timekeeping, billing rates and audit documentation inside Acumatica Cloud ERP. It brings structure, control and visibility to the financial processes that matter most in federal contracting.

WHY IT MATTERS

DCAA compliance depends on clean records, clear approvals and defensible cost accounting. This helps reduce audit risk before problems surface.

HOW IT WORKS

DCAA rules are enabled by project. Government projects receive DCAA-specific controls while commercial projects continue under standard Acumatica workflows.

BUSINESS IMPACT

DCAA Compliance reduces manual compliance work while improving cost accuracy, billing control and audit defensibility.

WHAT IT DOES

- ✓ Maintains and reconciles provisional indirect rates
- ✓ Enforces compliant time and expense controls
- ✓ Connects contracts, projects, CLINs and billing
- ✓ Tracks project and CLIN ceiling limits
- ✓ Produces 47 DCAA-focused audit reports

KEY FEATURES

- ✓ Provisional rate setup and reconciliation
- ✓ Time and expense rule enforcement
- ✓ Billing rate recognition
- ✓ Manufacturing cost reconciliation
- ✓ SAM.gov entity and exclusion checks
- ✓ SF 1408 pre-audit reporting

CAPABILITIES

- ✓ Supports fixed-price, cost-reimbursable, T&M and labor-hour contracts
- ✓ Provides audit trails for time, expenses, approvals and rate changes
- ✓ Flags late time, backdated changes, rate variance and ceiling thresholds
- ✓ Produces 47 DCAA-focused reports with PDF and Excel export

Audit-ready government contractor accounting, built directly inside your ERP.
