

Integration that works. Automation that scales.

If your systems could talk to each other, **what problems would you solve first?**

CRM – ERP – eCommerce – WMS – Data Bases – SaaS

Explore real-world examples of how Flowgear integrations drive business results by department.

Sales

Streamlines quote-to-cash workflows and boosts revenue visibility across channels.

- **E-commerce Integration:** Sync your ERP with platforms like Shopify or Magento to auto-update order details, customer registrations, and vetting statuses.
- **CRM Deal Flow:** Push closed opportunities from CRM systems (e.g., Salesforce) into your ERP to trigger invoicing workflows.
- **Customer Record Updates:** Automatically update credit exposure and customer profiles in your ERP based on financial or risk triggers.
- **Product and Pricing Sync:** Keep product availability, pricing, and inventory in sync between your ERP, CRM, and e-commerce platforms for accurate quoting and order management.

Human Resources

Integrates HR with finance for seamless payroll, expense, and headcount management.

- **Payroll and Reimbursements Sync:** Post payroll entries and employee reimbursements directly to your ERP's GL accounts.
- **Time Tracking Integration:** Connect time and project costing systems to allocate labor costs accurately.
- **Employee Master Data Sync:** Maintain a consistent employee record across HR platforms and your ERP.
- **Compensation and Benefits Tracking:** Monitor compensation packages and benefits for compliance and budgeting purposes.
- **Onboarding Automation:** Trigger provisioning, payroll setup, and expense policies by syncing onboarding events between HR and finance systems.

Operations

Drives process automation, improves cost control, and aligns execution with financials.

- **POS Integration:** Connect your ERP with POS platforms (e.g., GAAP, VEND) to auto-update sales and inventory in real time.
- **Order Management Sync:** Integrate with customer or supplier ordering systems to auto-generate purchase and sales orders in your ERP.
- **Asset Tracking Integration:** Connect your ERP with asset tracking tools to monitor asset lifecycle, usage, and location for financial and operational control.

Manufacturing

Enhances coordination across production, inventory, and supply chain.

- **Production Order Sync:** Post actual material usage and labor costs directly to production orders via integration with manufacturing equipment.
- **Yield and Quality Tracking:** Monitor yield variances and capture quality check results within your ERP modules.
- **Compliance Data Integration:** Sync inspection and compliance data across manufacturing workflows for traceability and audit readiness.

Integrate with any application, service, API or database using our low-code iPaaS platform.

3Value Launches New Integration and Automation Division

3Value is excited to announce the launch of a Integration and Automation business unit, created to help our clients unlock new levels of efficiency, connectivity, and scalability.

Powered by Flowgear, a Gartner-recognized iPaaS platform, this new capability empowers businesses to rapidly integrate systems, automate workflows, and streamline operations across cloud and on-premises environments.

Whether you're modernizing legacy processes or enabling real-time data exchange, we now offer the expertise and technology to turn integration and automation complexity into competitive advantage.

Key Highlights

Built on Flowgear's .NET-based, no-to-low code integration platform.

Pre-built connectors integrate thousands of SaaS and on-premise applications.

Visual workflow designer for rapid integration development.

Supports complex, multi-endpoint integrations with advanced ETL and data mapping.

Cloud and on-premise deployment options from a single interface.

Flowgear adheres to industry standards and maintains a SOC 2 Type II certification.

Complimentary Proof of Concept

Curious how the integration will work with your systems? Let's show you. Book a call with our integration experts.

We'll build a custom proof of concept based on your needs. No credit card, no obligation.
